Dear Mr. Randell,

I just spoke to Angela and she advised me that you would be handling the UTC/Rohr PCB cleanup; Angela also said that she had briefed you on the arrangement with Jean and I to review and have time to make comments on submitted documents.

Jean and I are requesting to review submitted documents from Oct. 2016 to present. Thank you for your consideration.

Sincerely,

Bruce Bailey

Dear Ms. Sandoval,

Per our past e-mails, you said that I would have access to Rohr cleanup documents as they were completed for review and possible comments. Neither Jean or myself have received any e-mails on the status of the PCB cleanup at Rohr.

Also, have DTSC staff been advised of the plan to cap PCBs at Hazardous Waste levels onsite?

If you have any questions, please contact me at 909-709-3180.

Thank you for your consideration.

Sincerely,

Bruce Bailey

Dear Ms. Sandoval,

There appears to be a misunderstanding with Jean's request. This is the e-mail that that has not been addressed. Also, it is my understanding that Rohr has been taking samples onsite for close to 2 months and no reports have been listed on Geotracker or e-mailed for review.

Also, Jean Kayano with CCAEJ will be the main contact for review of Rohr/UTC documents and am requesting to be cc.

Thank you for your assistance.

Sincerely,

Bruce Bailey

Dear Ms. Sandoval,

I was able to open the Final Rohr Work Plan; I have attached Appendix A Federal EPA letter dated Nov. 15, 2015 which states " The Site has also contributed to historic discharges of PCB waste to the former Riverside wastewater treatment plant located immediately to the North of the site, which is part on an ongoing and separate EPA remediation initiative', (Riverside Ag Park Industrial/Municipal sewer treatment plant).

Please provide documentation on the so-called remediation initiative and the contact person; also note that this so-called initiative does not include property surrounding the Riverside Ag Park or the sewer lines between the Riverside Ag Park and the lines to the newer Sewer Treatment Plant.

I have also included Rohr and Riverside City legal documents that implicate Rohr as the source of the PCB contamination at the Riverside Ag Park.

Please confirm that you have received this e-mail. Thank you for your assistance.

Sincerely,

Bruce Bailey
CCA EJ Member/Advisor

Mr. Bailey,

As discussed today, here is the copy of the final workplan.

Sincerely,

Angela Hendrichsen Sandoval, PE, PMP
